

SUMMARY

I work at the intersection of design, business, and code, bringing together disciplines that are often separated across multiple roles. My background combines creative development, motion design, HTML5 advertising, Shopify e-commerce, hands-on small business experience and most recently, React app development and data-driven dashboards. My value is in being able to connect those disciplines. I understand the creative idea, the technology required to build it, and the business objective behind it.

I can contribute as a specialist within any of these areas or bring them together in a hybrid Creative Developer role—bridging design and development to turn ideas into polished, functional, high-performing digital experiences. Ultimately, I bring more than a decade of experience along with the ability and willingness to continue learning. I can contribute creatively, technically, and collaboratively while adapting to the evolving tools, technologies, workflows, and challenges that come with modern digital production.

EXPERIENCE

Omnicom Production - *Creative Developer* | July 2024 - May 2026

Merkley + Partners - *Creative Developer* | November 2019 - July 2024

Bannerboy Corporation - *Creative HTML Banner Developer* | May 2018 - June 2019

Elizabeth Arden - *Creative Ad Developer* | February 2018 - April 2018

Droga5 - *Creative Ad Developer* | April 2015 - May 2017

SKILL STACK

React, JSX, Vite, Tailwind CSS, TypeScript, Shadcn, UI/UX, GSAP, Dynamic Creative Optimization - DCO, Digital Out-of-Home - DOOH, Animated Banners, HTML5, CSS3, JavaScript es6, jQuery, JSON, Ajax, RESTful APIs, NPM, Git, GitHub, ESLint, Terminal, VS Code, Chrome DevTools, PHP, Lucide-react, Google Web Designer, Flashtalking, DoubleClick Campaign Manager, Adobe Creative Suite, Blender, Bambu Studio, Affinity, Canva, Shopify, Printful, Google Analytics, Google Search Console, Google Merchant Center, Google Business Profile, Meta Business Suite, Asana, Notion, Slack, FileZilla, Microsoft Suite, Claude AI & Agentic coding.

EDUCATION

Master of Science in Business Innovation & Entrepreneurship - Full Sail University, FL | 2017 – 2018

Bachelor of Science in Web Design & Development - Full Sail University, FL | 2012 – 2015

Certification in Print Media & Web Development - University of Rhode Island, RI | 2011

HOW I WORK

I work best from a clear, detailed brief. Once I understand the project, its requirements, and the expected outcome, I take ownership and dig in. I research, reference previous projects and existing resources, explore solutions, and build independently—bringing in teammates or project leads when I encounter blockers or need clarification.

I approach projects with both creative and technical considerations in mind, using my experience across design and development to anticipate challenges before they become problems. I welcome feedback, offer recommendations when my experience suggests a different approach, communicate potential technical or production concerns, and ultimately execute what the project requires.

When managing multiple projects, I prioritize around deadlines and communicate when competing deliverables require additional direction. I also continuously look for ways to streamline, automate, and organize my own workflows so I can work more efficiently without sacrificing quality. My philosophy is simple: understand what is expected, take ownership of it, communicate when necessary, and under-promise while over-delivering.

WHY HIRE ME?

I will be able to step into any new role backed by more than 10 years of industry experience, including working within some of the largest agencies in the world. I work just as effectively as part of a collaborative team as I do independently in remote roles, and I bring a dynamic and unique combination of experiences, technical knowledge, creative problem-solving, and practical skills that can enhance any project I work on and any team I work with.

I am a project-based learner who can quickly adapt to new technologies, tools, platforms, and workflows based on the needs of a project. Rather than limiting myself to a single discipline, I have developed a broad skill set across design, front-end development, digital production, creative technology, and project execution. This allows me to understand projects from multiple perspectives and contribute beyond the boundaries of a traditional job description.

I utilize both conventional and abstract resources within my workflows, combining established industry practices with research, experimentation, emerging technologies, automation, and new approaches to solving problems. I am comfortable figuring things out, learning unfamiliar systems, troubleshooting technical challenges, and developing practical solutions when an existing process or tool does not fully meet the needs of a project.

I am proficient in multiple industry-standard design and development tools and have extensive experience working across creative and technical environments. I can navigate, organize, prepare, and manage resource files across multiple platforms while maintaining the structure, accuracy, and attention to detail required in professional production environments.
