

SUMMARY

Creative Developer with 10+ years of experience hand-coding high-volume HTML5 ad banners and JavaScript animations for major brands across the advertising and marketing industry. Built and maintained a custom GreenSock-based production framework that enables rapid, scalable banner development — consistently managing 3 to 4 projects while delivering up to 50 banner units per week across campaigns. Managed full production lifecycle from creative comp to final delivery, including retina-optimized asset preparation, cross-browser QA, and a custom-built HTML/JavaScript staging site for client review and asset delivery.

Currently building single-page web applications and data-driven dashboards using React 19, Tailwind CSS, shadcn/ui, and GSAP animation integrated into component-based architecture through the useGSAP hook — bridging 10+ years of hand-tuned animation craft directly into modern front-end development. Hold a Master of Science in Business Innovation & Entrepreneurship and have applied that education to the launch and development of a multi-division e-commerce operation, managing storefront architecture, marketing and analytics, fulfillment logistics, and financial operations end-to-end.

EXPERIENCE

Omnicom Production - *Creative Developer* | July 2024 - May 2026

Merkley + Partners - *Creative Developer* | November 2019 - July 2024
